LAND CERTIFICATION PROGRAM OVERVIEW

recognize • encourage • inspire

I. PROGRAM OBJECTIVES:

The Quality Deer Management Association’s (QDMA) Land Certification Program was developed to achieve the following objectives:

1. Recognize the accomplishments of landowners and sportsmen implementing the four cornerstones of Quality Deer Management (QDM) throughout North America, as well as those committed to ethics, conservation and biodiversity through land stewardship; and
2. Encourage management practices on participating lands that will enhance deer and other wild-life species, habitat conditions, and hunting experiences by providing incentives, recommendations and/or assistance; and
3. Inspire others to engage in sound wildlife management and conservation of our natural resources.

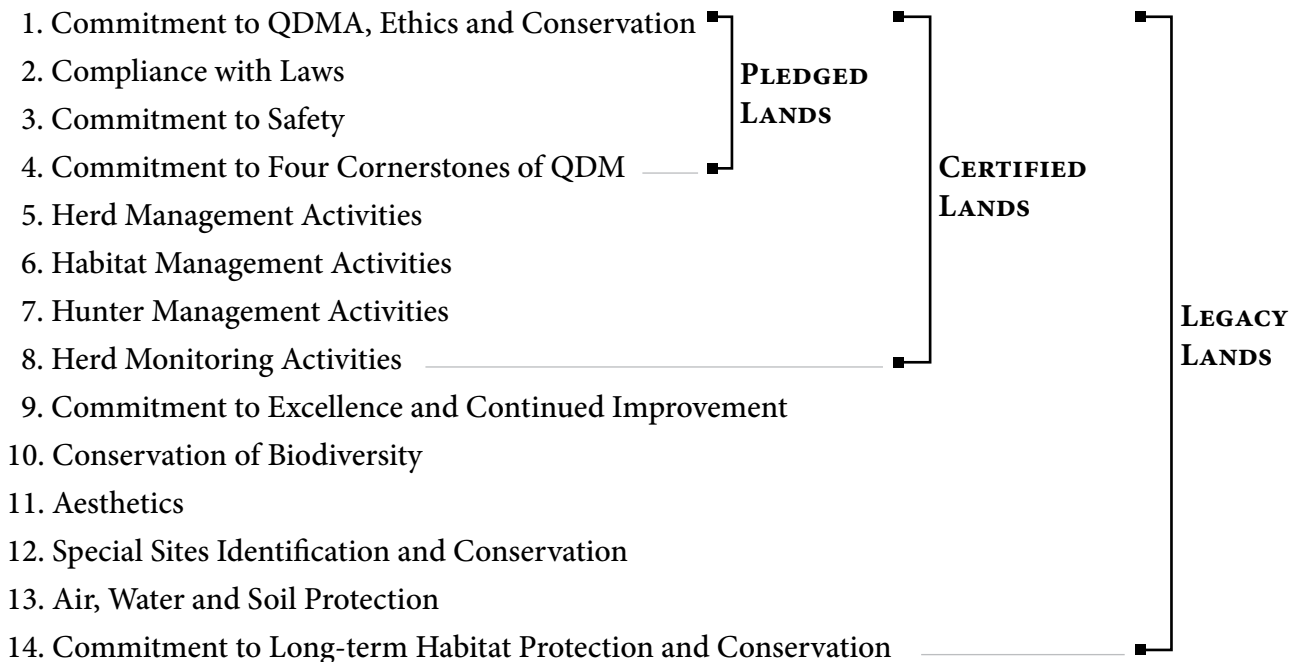

II. PROGRAM STANDARDS:

The QDMA Land Certification Program is a voluntary process which evaluates one or more properties against established standards and performance measures. Given the variation in deer herds, habitats, and hunting styles throughout the whitetail’s range, applicants are encouraged to adapt their specific objectives, goals and limitations to the framework provided.

Below is a list of the program’s standards that an applicant property will be measured against:

QDMA LAND CERTIFICATION PROGRAM STANDARDS

III. PROPERTY APPRENTICE LEVEL

There is one apprentice level for the Land Certification Program:

QDMA Pledged Lands – Recognizes properties committed to QDM, the QDMA, wildlife laws and safety (Standards 1-4). This designation does not require a written management plan or a site visit by qualified property inspector, thus properties that achieve Pledged Lands status are not certified; self-application available. Applicants can bypass this level and apply directly for one of the certification levels if so desired.

IV. PROPERTY CERTIFICATION LEVELS

There are two certification levels within the Land Certification Program:

QDMA Certified Lands – Recognizes properties meeting the Pledged Lands requirements (Standards 1-4) as well as minimum qualifications for the four cornerstones of QDM (Standards 5-8). This designation requires a written, approved management plan¹ and a site visit by a qualified property inspector².

QDMA Legacy Lands – Recognizes properties that not only satisfy the requirements for Pledged and Certified Lands designation (Standards 1-8), but also meet minimum requirements for Standards 9-14. These properties exemplify the highest level of land protection, conservation, stewardship, and commitment to the preservation of our hunting heritage. This designation also requires a written, approved management plan¹ and site visit by qualified property inspector².

¹Approved management plans include those obtained through the Forest Stewardship Program, American Tree Farm System, Natural Resource Conservation Service, private forest/wildlife consultants, and other plans deemed equivalent and approved by QDMA.

²QDMA will approve qualified property inspectors through professional standards and mandated training sessions. A list of approved inspectors is available from QDMA.

V. PROPERTY MANAGEMENT CLASSIFICATIONS:

Within the two Property Certification Levels, there are two Property Management Classifications:

Individual - designed for single landowners, leased land holders, LLCs, companies, or similar legal entities.

Group – designed for groups of landowners or QDM Cooperatives wishing to have their collective lands designated under a single application. A minimum of two land ownerships is required, and all properties must be managed under a common set of goals and/or objectives.

VI. NON-CONTIGUOUS ACREAGE

In cases of non-contiguous acreage, properties under one ownership, group or lease agreement that fall within the same principal county OR are within 5 miles (as the crow flies) of the closest boundary point of the largest parcel may be certified under the same application and fee schedule.

VII. PROPERTY DESIGNATION TRANSFER OR REVOCATION

From a legal standpoint, none of the QDMA Land Certification Program designations are permanently binding, nor do they create encumbrances on the property if the land is sold, transferred or inherited. However, in the event a property designated under the Land Certification Program is sold or changes ownership (e.g., deed transfer, by Will or at death, etc.), a transfer of designation to the new owner is permissible for a nominal fee and a signed commitment by the new owner(s) will be required.

All properties must continuously maintain the standards set by the QDMA, or they will be decertified.

VIII. PROPERTY RECOGNITION

Once a property meets the requirements of a given designation category, the applicant property will receive a certificate and one (1) property sign.

All applicants may purchase additional signs (at their designation level) and/or a unique name plate (to place below the level-specific sign) for a nominal fee.

	3000+	Yes	1-14	On-site	5	\$0.14/ac.	\$0.10/ac.	Yes
<u>Legacy Group</u>	<u>Acreage</u>	<u>Management Plan Required</u>	<u>QDMA* Standards Required</u>	<u>Inspection</u>	<u>Renewal Frequency (# of yrs)</u>	<u>Application Fee</u>	<u>Renewal Fee</u>	<u>Sign Provided</u>
	< 500	Yes	1-14	On-site	5	\$400	\$300	Yes
	500-999	Yes	1-14	On-site	5	\$450	\$350	Yes
	1000-2999	Yes	1-14	On-site	5	\$500	\$400	Yes
	3000+	Yes	1-14	On-site	5	\$0.17/ac.	\$0.14/ac.	Yes

³Fees include Land Certification Program application, signage, new/renewal QDMA membership for one year for Pledged Lands or for five years for Certified and Legacy Lands, and entry into program; additional costs may or may not be incurred from inspection process for Certified and Legacy Lands, depending on qualified inspector chosen. Fees for properties over 10,000 acres will be evaluated on a case-by-case basis.

*QDMA Standards are defined in more detail in a separate document, as part of the application process.
